

# Class

- |  |                                  |
|--|----------------------------------|
| 5'-deoxyribonucleosides                  | Organoxygen compounds            |
| Benzene and substituted derivatives      | Phenols                          |
| Biotin and derivatives                   | Polyketides                      |
| Carboxylic acids and derivatives         | Prenol lipids                    |
| Cinnamic acids and derivatives           | Pteridines and derivatives       |
| Diazines                                 | Purine nucleosides               |
| Fatty Acyls                              | Purine nucleotides               |
| Flavin nucleotides                       | Pyrenes                          |
| Glycerophospholipids                     | Pyridines and derivatives        |
| Glycinamide ribonucleotides              | Pyrimidine nucleosides           |
| Hydroxy acids and derivatives            | Pyrimidine nucleotides           |
| Imidazopyrimidines                       | Pyrrolopyrimidines               |
| Indoles and derivatives                  | Ribonucleoside 3'-phosphates     |
| Isoquinolines and derivatives            | Steroids and steroid derivatives |
| Organic phosphoric acids and derivatives | Unclassified                     |
| Organonitrogen compounds                 |                                  |
